EXPERIENCE

Trainee – Python Programming (On-Campus Training)

Netcoreinfo Business Group, Noida **April 2023 - June 2023**

- Gained hands-on experience with Python, Pandas, NumPy & Django.
- Earned a certificate of completion.

PROJECTS

Multi-Document RAG Chatbot

AI-powered document analysis system enabling users to query insights from multiple documents using Retrieval-Augmented Generation.

- Developed semantic search with BAAI embeddings and LLM integration (Mistral) for context-aware Q&A with reduced hallucination.
- Built async FastAPI backend and Streamlit interface with vector storage, achieving 2–10s response time and reducing manual review by ~70%.
- **Technology Used:** Python, FastAPI, Streamlit, LlamaIndex, Mistral, BAAI Embeddings, Vector Search, SQLite, REST APIs.

AI-Powered Resume Matcher

AI-driven full-stack web application to evaluate resume–job description alignment for job seekers and recruiters.

- Designed candidate and recruiter pipelines with AI-driven resume scoring, improvement suggestions, and hire/no-hire decisions using Gemini API.
- Implemented classical NLP similarity modeling (TF-IDF, cosine similarity) with scalable batch processing for PDF, DOCX, and TXT resumes.
- Validated on 50+ real resumes across diverse job descriptions, achieving 85%+ agreement with manual recruiter shortlisting decisions.
- **Technology Used:** Python, Flask, Google Gemini API, Scikit-learn, NLP (TF-IDF, Cosine Similarity), PyPDF2, docx2txt, SQLAlchemy, SQLite.

Amazon Data Scraping

Web scraping and data extraction project simulating the extraction stage of an ETL pipeline.

- Scraped and structured 300+ product listings across multiple Amazon categories, extracting 8+ metadata fields per record (title, price, rating, reviews, ASIN, etc.).
- Achieved 98% data completeness after Pandas-based cleaning, null-handling, and validation pipeline.
- **Technology Used:** Python, BeautifulSoup, Pandas, NumPy.

SKILLS

- **Programming Languages:** Python, HTML, CSS, JavaScript
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Seaborn, SciPy, Scikit-learn, PyTorch, Flask, FastAPI, Streamlit, BeautifulSoup
- **Databases:** SQL, MongoDB
- **Web Development:** Front-end (HTML, CSS, JavaScript), Backend (Flask, FastAPI), REST API integration.
- **Data Science & Machine Learning:** EDA, Feature Engineering, Supervised Learning, unsupervised Learning, Model Evaluation (accuracy, precision, recall), Overfitting/Underfitting Handling, NLP (TF-IDF, Cosine Similarity).
- **Generative AI & LLMs:** RAG Pipelines, LlamaIndex, Mistral LLM, BAAI Embeddings, Vector Search, Semantic Search
- **ETL & Data Pipelines:** Data Extraction, Transformation, Loading, Cleaning, Preprocessing & Visualization.
- **Areas Of Interest:** Data Science, Machine Learning, Natural Language Processing (NLP), Generative AI, LLM-based Application Development, Data Analysis, Web Development
- **Tools & Software:** Well-versed with MS Office and Internet Applications.
- **Soft Skills:** Problem-solving, Analytical Thinking, Time Management, Effective Communication.

EDUCATION

- **Master of Computer Applications** — Expected Completion: Aug 2026
  JIMS Rohini, Sector-5, Affiliated to Guru Gobind Singh Indraprastha University — CGPA: 8.3
- **Bachelor of Computer Applications** — Graduated: 2024
  KIHEAT, Dwarka, Affiliated to Guru Gobind Singh Indraprastha University — CGPA: 8.5
- **Senior Secondary School** — Year of Completion: 2021
  CBSE - Kendriya Vidyalaya • Gole Market, Delhi — Stream: PCM with CS

CERTIFICATIONS

Exploratory Data Analysis for Machine Learning (IBM)
Web Scraping with Python (GLA)
Technical Support Fundamentals (Google)
Python Pandas (GLA)
